SureVideo

Digital Signage Solution

Secure. Monitor. Manage.

Digital Signage solutions help grab customer attention and deliver targeted content. That's precisely why they are widely used to display ads, news, product information, or any other message businesses want to convey to their customers.

SureVideo by 42Gears UEM turns Andriod tablets, TV sticks, iPads, and Windows devices into portable yet versatile digital signage devices. SureVideo can help:

Loop Allowed Media Files

You can use SureVideo to loop selected media files on a device. Just choose a file or create a playlist to quickly turn iOS, Android, and Windows devices into portable digital signages.

Secure Devices

SureVideo's password-protected settings ensure that the device is not misused or tampered with. Once the Kiosk Mode is enabled, Sure Video blocks access to apps, device home, and device settings.

Configure & Deploy Devices Quickly through Cloud

SureVideo lets you import/export settings to a secure cloud for quick and easy mass configuration and deployment. You can use this to auto-configure a playlist or configure lockdown settings over-the-air.

Customize the User Interface

SureVideo also allows you to customize the look and feel of a device. You can change wallpapers, add overlay buttons or screensavers, set screen behavior on a specified status and more.

More than 10,000 customers across 115 countries rely on 42Gears to harness the power of a limitless digital workspace. We pride ourselves on being a nimble and flexible organization.

SureVideo - Digital Signage Solution

42GEARS

Setting up SureVideo is easy and simple. Just install SureVideo on the device and configure the playlist.

Key Features:

Loop Allowed Media Files Only
Specify and allow looping of only allowed media files in lockdown mode.

Launch at Startup
Set SureVideo to launch automatically whenever the device is switched on or rebooted.

Device Security
Secure devices by blocking access to apps, device settings, and device home.

Branding & Personalization
Brand mobile devices by customizing the UI with wallpapers, icons, screensavers, title bars, etc.

Kiosk Mode
Disable/Hide bottom/status bar and ensure only allowed media files can be looped and played.

Stream YouTube Videos
Stream and loop videos from YouTube in lockdown mode.

RSS Feed
Enable RSS feed on the video screen to customize color, size, and position.

Auto Lockdown Configuration
Import/export settings to cloud to schedule auto lockdown.

Compatibility with SureMDM powered by 42Gears UEM
Use SureMDM to remotely install, configure and manage SureVideo.

Disable Hardware Button
Disable the external power button.

SureVideo Analytics
Learn which media files were most viewed by users and for how long were your media files viewed.

Battery Savings
Enable battery saving features like auto-brightness adjustment, brightness on battery level, etc.

Offline Activation
Activate SureVideo without an internet connection using device details like IMEI and Wi-Fi MAC.
