

Skorpio X3™ Obsolescence Notice

After many years of successful installations, Datalogic must announce the obsolescence of the **Skorpio X3™** product line including all special variants, effective March 31, 2018.

Replacement Product Recommendation

Datalogic recommends the Skorpio™ X4 as the logical replacement of the Skorpio X3, while retaining full compatibility with all the Skorpio X3 accessories. The Skorpio X4 is a new state of the art device with an attractive price, loaded with amazing technology, rugged and reliable, and ideal for inventory and other in-store or logistics applications.

The Skorpio X4 mobile computer features a high performance multi-core 1 GHz architecture, boasting plenty of memory with the standard 1 GB RAM and 8 GB flash. The Skorpio X4 device is available in both Windows™ Embedded Compact 7 (WEC7) for backwards compatibility and in an Android™ 4.4 version.

The table below reflects the Skorpio X3™ part numbers going obsolete along with the recommended replacement X4 part number; please note that we indicate WEC7 for backwards compatibility but it is of course possible to replace a CE6/WEHH 6.5 Skorpio X3 with a Skorpio X4 Android depending on your application.
